# 어마어마한 공중 버스

140 words

1 Good evening, everyone. As mayor, I want to announce the solution to our traffic and pollution problems: elevated buses. These are newly invented buses that look like moving tunnels. Let me tell you some of their benefits.

First, elevated buses move above traffic, so they don't take up road space  
5 like regular buses. Also, they can carry more than 1,000 people at a time. This will reduce traffic as more people will use buses instead of cars. In addition, these buses use solar energy. This clean energy will reduce air pollution and improve our health.

I know many of you are worried about the cost of these buses. However, they  
10 are much **cheaper than** subway trains. I truly believe these buses will make our lives better. I hope you'll support my decision to make **them** a part of our city.

elevated bus 터널 버스 (터널처럼 생겼으나 승객을 태우고 이동하는 버스)

## Dictation

1. M: Hey, Susan. You look depressed. What happened?

W: I didn't do well on my English test.

M: But you spent so much time studying for it.

W: I know. The problem wasn't how hard the test was.

M: Then what was the problem?

W: I was stuck in traffic on the way to school.

M: So you didn't get to school on time?

W: Exactly. I was late for the test and didn't have enough time to finish it.

M: That's too bad. This city really has to improve its traffic system.

2. W: Jason, what are you reading?

M: It's a book about solar energy. I have to write an essay for my science class.

W: I've heard solar energy has a lot of benefits for our environment.

M: Definitely. In the long term, it will reduce the cost of electricity, too.

W: Right. What else did you learn from the book?

M: It saves energy during the day so that we can use it later.

W: Wow! What about the disadvantages of solar energy?

M: I haven't read about any yet. Now I totally support the idea of using solar energy.
