# 어마어마한 공중 버스

Good evening, everyone. As mayor, I want to announce the solution to our traffic and pollution problems: elevated buses. These are newly invented buses that look like moving tunnels. Let me tell you some of their benefits.

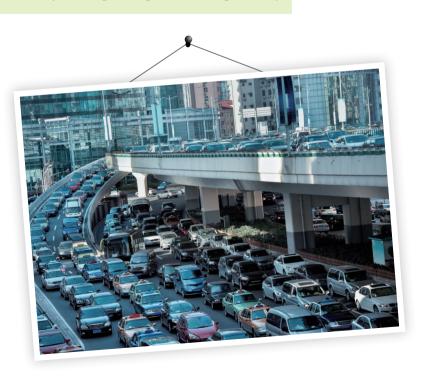

First, elevated buses move above traffic, so they don't take up road space like regular buses. Also, they can carry more than 1,000 people at a time. This will reduce traffic as more people will use buses instead of cars. In addition, these buses use solar energy. This clean energy will reduce air pollution and improve our health.

I know many of you are worried about the cost of these buses. However, they are much **cheaper than** subway trains. I truly believe these buses will make our lives better. I hope you'll support my decision to make **them** a part of our city.

**4. M:** Excuse me. I'm the building manager. Can I ask <u>what</u> <u>you're doing</u> now?

W: I'm throwing the garbage into the bin. Why?

M: Aren't those plastic bottles and aluminum cans?

W: Yes. Don't they go into the \_\_\_\_trash \_\_\_\_bin ?

M: No. They should <u>be put into</u> the recycling boxes.

W: I'm sorry. I didn't know that.

**M:** Throwing recyclable garbage into the normal garbage bin can cause pollution.

W: <u>ls that why</u> there are different boxes over there?

**M:** Yes. We <u>prepared</u> the recycling bins for our residents to use.
